IATS Upgrades

Each IATS release includes regulatory changes that modify certain entitlements. If you are not on the current version, you are paying our service members incorrectly on some entitlements. It strongly recommended that you upgrade immediately to the current version each time you receive it. Also, if any site is on an IATS version prior to 7.1.1, you are using a non-supported version of Sybase and that this a security violation. You need to upgrade immediately Contact the IATS Help Desk if you need the current software or assistance upgrading.
