CURRENT/FUTURE RELEASES

The latest version of IATS 8.3.0 is now available and sites should have received it. If you haven't and need it, please reach out to the IATS help desk. As a reminder, the DFAS provided Sybase license expired on September 30th and all sites should be migrating to MSSQL. If your agency has procured a Sybase license of your own, you may contact the IATS helpdesk for an updated Sybase version (7.7) and rate updates for Sybase. This latest IATS version has many changes including changes to TLE effective 1/1/2023 so it is imperative that you install it as soon as you receive it.

Tax Reminder!!

If there is a problem with taxes and year-end reports or closing of the books, please stop what you are doing, take screen shots, make notes and send the issue to the DFAS help desk right away to help find the issue and correct it before anything else is done to potentially make the problem worse.

Research EFT Rejects

When running the download from disbursing, at the end of the process the user is prompted to print the download error report. The user should print that each time and look for EFT rejections. This error means the bank rejected the payment due to bad information or the account is closed. The site needs to correct the EFT information and reissue the payment ASAP. The best way to do this is create a TDY order, input a precomputed amount for the net payment that was rejected and use the same LOAs.
