Volume XXV	Number 1	January 2023

CURRENT/FUTURE RELEASES

The latest version of IATS 8.3.0 is now available and sites should be receiving it any day if you haven't already. As a reminder, the DFAS provided Sybase license expired on September 30th and all sites should be migrating to MSSQL. If your agency has procured a Sybase license of your own, you may contact the IATS helpdesk for an updated Sybase version and rate updates for Sybase. This latest IATS version has many changes including changes to TLE effective 1/1/2023 so it is imperative that you install it as soon as you receive it.

IATS ATOC

IATS received its Authority To Operate with Conditions (ATOC) on November 1, 2022 which is valid through November 1, 2023 for IATS Versions 8.X and replaces any prior ATO issued. As a reminder, Sybase versions of 7.X are not covered under this ATO. If you have not already migrated to version 8.X, we urge you to do so as soon as possible. Please contact the IATS help desk if you need assistance with the migration.

Travel Tip of the Month:

In version 8.3 there is a change to the defaulted answer to the prompt when asked "is this advance going to be settled by another office"? The prompt default will now be 'NO' instead of 'YES' as shown in the screenshot below.

For MILPCS advances that are issued in one place and settled at another, you will need to select 'Yes' in the screenshot above. This will check the box to indicate it is a Transient Traveler (as shown below).
