

PLEASE DISTRIBUTE TO TRAVEL BRANCH SUPERVISORS AND EXAMINERS

Volume XXIV	Number 3	March 2022
-------------	----------	------------

CURRENT/FUTURE RELEASES

The current version is 7.5.0 if sites are staying on Sybase 17 and 8.1.0 if sites are moving to MS SQL.

Two reminders: upgrade to version 7.3.1 and begin preparations for the move to SQL Server with 8.0 or 8.1.

We request you migrate to version 8.1.0 or 7.5.0 as soon as possible. You will be required to obtain your own Sybase license to support version 7.x.

Travel Tech Messages can be found at the following:

DSN: 699-7718

Prior to upgrading to 7.4 or 8.0, it is important to do the following:

1. **Make a backup of your current database**
2. **If upgrading to 7.4 – Ensure CAC enabled is turned off. After running the update, you can turn it on.**
3. **If upgrading to 8.0 – Download the latest OLE Driver for MS SQL server from:** <https://docs.microsoft.com/en-us/sql/connect/oledb/download-oledb-driver-for-sql-server?view=sql-server-ver15>

And see this in the middle of the page:

The OLE DB Driver for SQL Server is a stand-alone data access application programming interface (API), used for OLE DB. OLE DB Driver for SQL Server is available on Windows and delivers the SQL OLE DB driver in one dynamic-link library (DLL).

Download

The redistributable installer for Microsoft OLE DB Driver for SQL Server installs the client components required during run time to take advantage of newer SQL Server features. Starting with version 18.3, the installer also includes and installs the Microsoft Active Directory Authentication Library (ADAL.dll).

Microsoft OLE DB Driver 18.6 for SQL Server is the latest general availability (GA) version. If you have a previous version of Microsoft OLE DB Driver 18 for SQL Server installed, installing 18.6 upgrades it to 18.6.
